Introduction

AIO (All In One) is an Ethereum-based ERC20 token created by Aaress Fintech Inc. - a registered incorporation setup in the global financial capital Hong Kong. We are a company run by professional fund managers and crypto currency experts. At Aaress Fintech Inc. we are in the process of launching a perfect solution for all crypto currency investors and users who are currently investing in new digital assets, without knowing the exact future growth of that particular asset.

There are almost 5 to 6 new coins/tokens launched everyday on different exchanges. All of them are of different nature and objectives. One never knows which one of them will survive and succeed in desired objectives; hence we are here to provide a perfect solution to all investors who wish to invest wisely and profitably in digital assets like Bitcoin, Ethereum, Litecoin, Dash, Monero etc.

Top traded crypto currency values have risen exponentially, setting them beyond the reach of common people. This is where AIO (All in One) has come out with a brilliant solution whereby anyone can get benefit by having this exponential growth of the crypto currency market placed within their reach

Concept

AIO (All In One) as the name suggests is an “All In One” coin. Instead of buying different Tokens & Coins, simply buy only one token which will have a price effect of all the top traded high demand coins. AIO is generating a pool of funds through its Initial Coin Offering (ICO), which will hold these funds and the value of these funds shall be assigned to all Tokens issued.

The entire process of the ICO and later of the fund holdings shall always remain public through our official website, anyone and everyone can verify the company holdings and net asset value in real time through the wallet address. As the value of holdings grows or falls so the value of AIO shall grow or fall in equal proportion in real-time.

Once the ICO is over we shall publish the exact amount of coins collected during ICO period on our website and a real-time chart will display the growth or decline of value in percentage via the chart.

This is a first of its kind concept since the inception of crypto currencies launched trading through exchanges. AIO is going to be a first digital asset having a real value backed by actual crypto currency assets with a real time price effect on each token holder.

AIO will have a dual price effect as it will be limited in number. The AIO price will depend on demand and supply as well as on actual fund value of holdings.

ICO Token Information

Token Name: AIO (All in One) is an Ethereum-based ERC20 smart contract token representing a fund value collected through an ICO by Aaress Fintech Inc. and assigned to each token distributed through ICO. Holders of these tokens shall get value appreciation through actual crypto currency holdings of AIO (All In One).

Token Supply: 500 Million AIO (All In One) shall be mined at once at the inception of the contract.

All unsold tokens shall be destroyed at the end of the token sale except for 10% of the total sold tokens, which shall be the founders share & the future development fund. Initial Rate: Price per Token is locked at \$ 1 for the ICO (Initial Coin Offering)

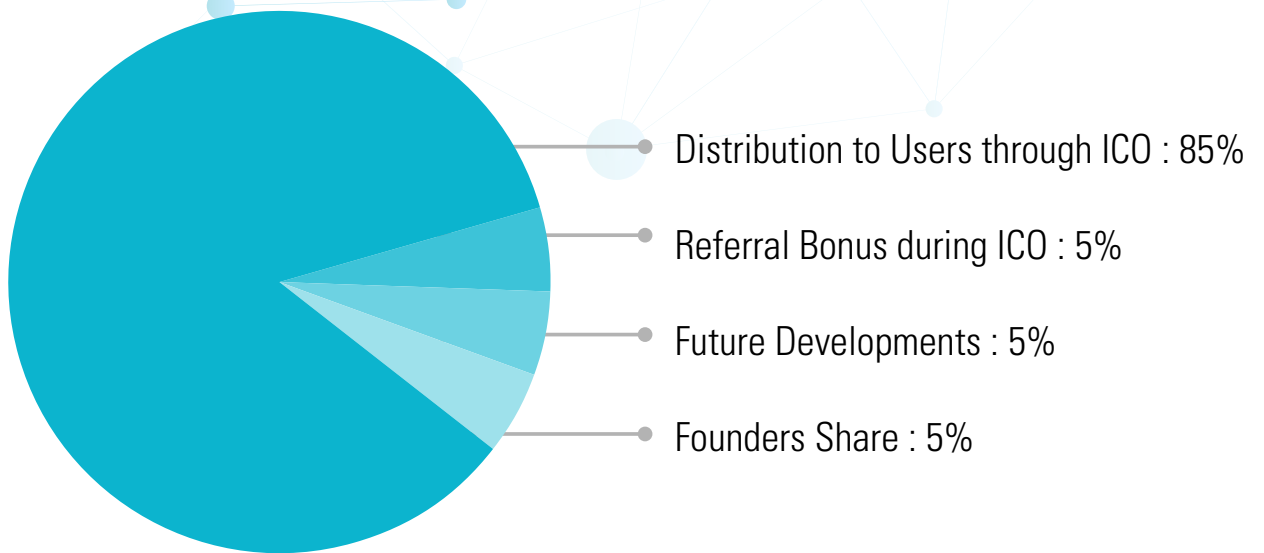

ICO Structure

During ICO if 100% target is not achieved then after distributing Referral Bonuses, 5% of founders share and future development funds, remaining tokens shall be destroyed.

Token Distribution

Future Plan

Aaress Fintech Inc. is planning to introduce new financial instruments in crypto currency which may change the way we trade in crypto currencies. Our team is in the process of developing a regulated Futures Index and Options Trading in crypto currencies which is going to be the first of its kind crypto exchange with advanced trading options with limit buy and sell options.

Furthermore we will introduce sector specific Digital Currency Pools with the objective to provide funding in different sectors like Construction, Pharmaceuticals, IT, Banking, Retail, Space Research, Ayurvedic medicines & Alternative Therapies etc.

Our Ideology

At Aaress Fintech Inc are committed to bring trusted world class investment options for everyone so that you can participate and benefit from the exponential growth in crypto currency market.

Aaress Fintech Inc's sole objective is to provide advance profit making in an easy to use interface for all
